SHEET

TRANSPARENT, WHITENING AND ANTIQUING WAX

Easy-to-apply waxes that leave a soft touch to the object, allowing it to be sealed, protected and decorated.

Colorless Wax is used to protect the surface, but can also be used for **Shabby chic (Pickled)** style decorations (1). White Wax has been designed to give a dusty white finish to furniture or other objects. The Dark Wax allows you to give an aged effect to the piece and neutralize the brilliance of the colors.

They can be used on wood, plaster, alabaster, resin, foils, painted surfaces, etc. Apply with a clean cloth or brush, removing any excess product, allow to dry and polish the surface is polished until the desired finish is achieved.

(1) Give the object a coat of color. Once completely dry, apply the transparent wax with a sponge, cloth or brush in the areas where you will later sand. Let it dry.

Apply one coat with another color, in contrast to the previous one. Leave to dry.

Once completely dry, sand the object in the areas where previously wax was applied. In these areas the paint will come off easily, giving the object a worn and worn appearance.

Finish the project by applying a layer of clear wax to protect and nourish the substrate.

SPECIFIC GRAVITY: 0.780 ± 0.010 g/cc at 20°C
