| <b>PREPARATION OF THE PRODUCT</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>APPLICATION</b>                | Apply 1 or 2 coats with a brush or roller. Apply a preparation primer to the bare metal spots, then apply E.C Gold or Silver. To prevent oxidation, apply a coat of E.C Acrylic Varnish.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

#### **NOTES:**

The application temperature should be between +10°C and +30°C. Wash the tools immediately after use. It can be kept for at least 2 years in its closed original packaging.

Containers and material residues must be disposed of in accordance with local and national regulations.
