TECHNICAL DATA SHEET

Description:

Glitter powder used as an additive in paint and varnish for use in both indoor and outdoor environments.

Application:

Thanks to the characteristics of the product, we recommend using it as a final finish.

- For DiY use
- For Decoration
- They do not contain environmentally harmful plastics
- Easy to use
- For household use

Instructions:

- Add Glitter either to varnish in a 1:1 ratio for a full-coverage effect, or to color depending on the coverage and effect you want to achieve.
- Apply it in thin layers to achieve better results, two thin layers are better than one thick layer. Repaint after 30 minutes to 1 hour.
- The DDA is given upon request.

Features:

- Quick drying
- Adheres very well to any surface
- Very Covert
- Can be used indoors
- Easy to apply and paint
