

RENOVATION PAINT PEINTURE RENOV' CUISINE & BAIN Biobased

Bio-based paint specially designed to withstand wet spaces and surfaces of high use and pressure. Ideal for the sustainable renovation of furniture, worktops and kitchen sinks, tiled walls, bathroom countertops, etc.

- Very High adhesion to raw, varnished or painted wood, melamine, formas, laminate, wall tiles
- Very High resistance to water splashes, condensation, stains and greases: does not clog pores
- Withstands heat and room temperature fluctuations (10°C – 40°C)
- Anti-vibration and anti-scratch: flexible and durable laminate film-film.
- Highly washable, category 1 (EN 13 300 standard): easy daily cleaning with water and neutral detergents without altering the film/film and shades.
- **It contains 76% natural, mineral and ingredients of organic** origin (not from organic farming), including 25% carbon of organic origin measured according to the NF EN 16640 standard.
- **Circular economy:** Formula containing at least 1% (SATIN appearance) and 7% (matte appearance) of recycled egg shell powder. Packaging containing at least 30% recycled plastic.

PREPARATION

1

Before applying the paint, remove any silicone sealant present on the surface and repeat the silicone application after the paint has completely dried.

- **On painted, varnished or impregnated wood, melamine, laminate:** sand the surface (sandpaper etc. 120), dust well and clean well with acetone.
- **On raw wood:** sand the surface (sandpaper co.100-120) and dust well.
- **On tannic woods (oak, chestnut, etc.),** apply a substrate suitable for the color **Renov' Cuisine & Bain Matt**, especially in light shades.
- **On oiled or waxed wood:** sand the surface with sandpaper in successive coke 40, 60 after 100, dust well and clean well with acetone.
- **On wall tiles, tiled countertop:** degrease with acetone, paying special attention to joints and taking care to eliminate any trace of residue and mold. **PRO TIP:** on smooth tiles, roughen the surface by sanding with 100-120 grit sandpaper to break the gloss on the surface and promote the adhesion of **the Renov' paint**.
- **On painted walls, plaster, plaster, wallpaper (in good condition):** remove parts that do not have good adhesion, remove dust.
- **On water-repellent placard surfaces:** dust off and apply a suitable substrate.

STEP

APPLICATION

2

Apply to healthy, clean and dry surface

1. Mix well before use to homogenize the color.
2. Start by painting the corners, corners, and joints with a brush.
3. Apply evenly with PEINTURE RENOV' CUISINE & BAIN with the microfiber ripolin roller, apply a 1st coat from top to bottom, crossing the passes. Allow to dry for 2 hours.
4. Apply a 2nd coat in the same way.

Dries and hardens quickly after 12 hours (48 hours are required for indoor shower):

Take some precautions in the first few days (bumps, stains, cleaning, etc.). All performance is achieved after 10 days of drying.
